SUMMARY

Machine Learning and AI engineering student with hands-on experience in Python, TensorFlow, and data-driven system design. **Smart India Hackathon 2025 winner**, with proven work on **AI-based transformer diagnostics**, computer vision, and intelligent IoT systems focused on real-world impact.

EDUCATION QUALIFICATION

EXAM / DEGREE	NAME OF iNSTITUTE	UNIVERSIT Y / BOARD	YEAR	PERCENTAGE
M.C.A	Ncrd Sterling Institute of Management Studies	University of Mumbai	2026	Present
BSC-IT	Royal College Of Science and Commerce	University of Mumbai	2024	7.88 CGPA

TECHNICAL SKILLS

- **Programming Languages:** Python, C, C++
- **Machine Learning & AI:** Scikit-learn, TensorFlow, PyTorch, Keras, Model Evaluation, Feature Engineering
- **Frameworks & Tools :** LangChain, LangGraph
- **IoT & Cloud:** Firebase, Azure IOT hub, MQTT, ESP32
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn

PROJECTS

- **AI-Driven Frequency Response Analysis for Transformer Diagnostics**
Smart India Hackathon 2025 – WINNING PROJECT
 - Designed an AI/ML-based system to diagnose mechanical and electrical faults in power transformers using Frequency Response Analysis (FRA).
 - Built data preprocessing pipelines to normalize and analyze multi-format FRA datasets (CSV, XML).
 - Applied machine learning-based pattern recognition to detect winding deformation and core faults.
 - Developed interactive visualization dashboards to support predictive maintenance decisions.
- **Automated Smart Wheelchair System**
 - Developed an IoT-enabled smart wheelchair with Brain signals control, voice control, and remote access.
 - Integrated ESP32 sensors with Firebase real-time database and a React.js-based web interface.
 - Focused on assistive technology and intelligent human-centered system design.

INTERNSHIP

Machine Learning Intern — Jyesta Corporate Entity Apr 2025 – Jun 2025

- Collected, cleaned, and pre-processed real-world datasets including handling missing values and feature engineering for ML pipelines.
- Implemented regression, classification, and clustering models using Python and Scikit-learn.
- Performed exploratory data analysis (EDA) using Pandas, Matplotlib, and Seaborn to identify trends and correlations.
- Evaluated and optimized models through hyperparameter tuning and performance metrics.

Certifications

- **The Complete Python Developer Bootcamp** - Udemy
- **Complete Agentic AI Bootcamp with LangGraph and LangChain** -Udemy
- **Complete Computer Vision Bootcamp with PyTorch & TensorFlow** - Udemy
- **Complete AI & Machine Learning, Data Science Bootcamp** - Udemy
